Bandung

# Google Developer Groups Bandung

GDG Bandung helps developers to **learn, connect, create, innovate, build** and **grow** together. The program aspires to be the most helpful resource for local developers to learn how to build on all **Google platforms**.

# Women Techmakers Bandung

We also collaborate with Women Techmakers Bandung. WTM provides visibility, community, and resources for women in technology to drive innovation and participation in the field.

 GDG Bandung

 Google Developer Groups

# devfest

Bandung

DevFests are local tech conferences hosted by Google Developer Groups (GDGs) around the world. They feature talks, hands-on demos, workshops, and codelabs on the latest Google tech. In 2022, there were 550+ DevFests, helping 320k+ developers. DevFest is the premiere local event for developers to learn about Google's latest technologies from Googlers, Google Developer Experts and speakers from the industry.

Saturday, 2 December 2023

Universitas Maranatha

# What to Expect from DevFest Bandung 2023 ?

## Technical content

Worldwide events hosted by the Google Developer Groups community, featuring leading experts on Google technologies in areas like Android, Firebase, Flutter, Machine Learning and so much more!

## Workshops

Full-day workshops, hands-on experiences, hacking and debugging events, all centered on your favorite Google Technologies.

## Networking

Meet and connect with other developers in your community.

# Topics

## Android

A talk session where the speakers will explain Mobile dev and show the demonstration of it to get to know the topic much better.

## WEB

Learn a lot about frontend and the ecosystem in web devs, to maintain code quality and follow best practices.

## ML/AI

Explore the latest advancements and discuss on cutting-edge technologies that revolutionize the world of artificial intelligence.

## Cloud

Discover, learn, and leverage the power of Google Cloud technologies for building scalable and innovative solutions.

## Flutter

A talk session where the speakers will explain development mobile apps and show the demonstration of it to get to know using flutter.
